ABOUT US

Red Doc Farm is excited to kick off 2023 with our inaugural semen catalog. The Sanchez family has been producing great beef genetics since 1979. In our effort to breed the best, we utilize cutting-edge genetic tools, test, and trials to identify the most profitable genetic packages. Feed efficiency testing, collection of carcass ultrasound, supported by actual harvest data, and use of DNA technology are just a few of the decision making tools used at Red Doc Farm. We have long been recognized for our innovative approaches to breeding profitable Santa Gertrudis genetics. Our program is focused on producing modern heat tolerant genetics with extraordinary carcass quality that perform at the highest level in heavily influenced Brahman herds as well as supply maximum heterosis in commercial Bos taurus based cowherds.

The cattle industry is a volatile business and in the coming years there will be challenges that will test economic sustainability for all industry members. The Red Doc sires presented in this catalog represent over four decades of advanced cattle breeding focused on genetics that will maximize returns on investment while optimizing performance under extreme environmental pressures.

CUSTOMER TESTIMONIALS

“AI has been the primary tool we have used to advance our cowherd to where it is today. With the use of semen carrying Red Doc Farm genetics, we have been able to expedite our goals. Red Doc Genetics are cutting edge and transfer the traits we desire onto their offspring and into our herd for generations. Red Doc Farm has been a great asset to our program and will continue to be.” -Tony Creech, Creech Farms

“We graze in southeastern Utah; our cattle run in elevations ranging from 5,000 to 10,000 feet. In the past 10 years drought conditions were more common and drier than normal in our already arid desert climate. We started searching for an outcross to our mostly Angus based herd in hopes to find a better suited fit for our range. We were lucky enough to find Red Doc. These cattle are easy fleshing, rugged, and still easy on the eye. The bulls have held up significantly better, the calves are easier fleshing, they wean faster, and the cross mothers are breeding back better. All this without giving up carcass traits. Thanks Red Doc Farm!”

-Rhett Crane, Last Chance Cattle

SIRE: TRUMP'S ACQUITTAL 8511

Owned by: Fuego 1032 LLC

Red Doc Fuego 1032 is perhaps the most complete package Red Doc Farm has produced. We believe this phenomenal young sire is the future of the Santa Gertrudis breed from both a performance and phenotype perspective. Red Doc Fuego 1032 hits the mark for calving ease, carcass, growth, marbling, feed efficiency and phenotype. With a BW EPD in the top 10% of the breed, combined with a WW EPD in the top 3% it is obvious 1032's offspring will not leave any dollars on the table at weaning. A YW EPD in the top 10%, CW in the top 3%, REA in the top 3%, and Marbling in the top 3% indicates this young sire will produce calves that have immense value to all members of the beef industry. Red Doc 1032 ranked #2 in the 2022 Red Hot Bull Sale offering for USDA carcass profitability. He was projected to grade Prime with an adjusted IMF of 9.27 and a calculated YG of 1.65. Millions of research and development dollars are spent to produce bulls like Red Doc Fuego 1032. This bull offers all the industry desired traits plus the hardiness and heterosis the Santa Gertrudis breed brings to the table.

DAM: RED DOC NEVER COMPARE 5011

Owned by: Double Barrel Cattle Co.

Red Doc Blaze 9508 is one of the most striking bulls in the industry today. He is a big topped, big ribbed, and deep sided bull that sires high performing calves with "the look" cattlemen like to see. His performance dataset is impressive, a negative BW EPD combined with a WW EPD in the top 4% is curve-bending. His WW data set is supported by a 122% ratio. All of his carcass traits fall easily into the top 25% of the breed. Regardless of your marketing strategy, at weaning or on the rail, Red Doc Blaze 9508's offspring will put money in your pocket.

EMBRYO SISTER: RED DOC BONITA 5312

Owned by: Smoking-N-Ash Ranch & Rancho La Ceiba

Red Doc Dinero 4088 is the offspring of 2 genetic lines that have had a tremendous impact on the Red Doc program, KR 189/11 crossed with the iconic Bonita cow family. Dinero combines high performing genetics in an extremely eye-appealing package. A WW EPD in the top 4% is supported by a 122% ratio in a large contemporary group. A REA ratio of 110% and an IMF ratio of 118% support a suite of carcass EPDs in the top 10% of the breed. At the 2015 Red Hot Bull Sale, Dinero was ranked the most profitable bull in his contemporary group on the USDA grid. This high accuracy sire is a popular choice for operations looking for calves that "weight-up" at weaning, feed efficiently, and produce a carcass that will hit all industry targets. A bonus is he sires the type and kind of replacement female sought by cattlemen nationwide.

Red Doc Todo 9561 represented a new paradigm at Red Doc, he was the first to measure a 14-inch REA and scan a 8.34 IMF, 8.308 adjusted. This bull has a proven pedigree coming from the donor dam Red Doc Never See 6353 and popular herd sire Red Doc Riot 7069 (Checkmate). Red Doc Todo 9561 is a standout bull and hits all the targets for performance. He ranks in the top 3% for WW EPD and his YW EPD places him in the top 3%. His YW EPD is backed by an actual YW of 1252 lbs. Red Doc Todo 9561 ranked as USDA Prime, YG 2 carcass, and had a feed conversion of 4.01lbs of feed to pound of gain. His suite of carcass traits are impressive with CW EPD in the top 4%, REA top 5%, and Marbling sitting in the top 3%. His marbling EPD is supported by an IMF ratio of 130%. This bull gets out and travels well, has a great phenotype and Red Doc's natural fleshing. This curve-bending sire's offspring will checks the boxes and be profitable for all industry sectors.

This bull is smooth made, travels well and hits the marks for all members of the beef industry. His actual BW of 62 lbs., WW of 692 lbs., YW of 1214 lbs. indicates he has a lot to offer the industry providing easy doing and functional genetics. 7069 ranked #9 on the Red Doc Carcass Value grid with an 827 lb. HCW, 13.8 REA, and an IMF of 4.34. This smooth made bull, fed exceptionally well with an ADG of 4.39lbs, F:G of 5.35lbs/1 lb. gain and for a $0.56/lb cost of gain. He is proving to be a popular choice for cattlemen looking to retain females and produce feeders that hit industry targets. His balanced indexes of 20-45-15 support his 7 measured traits that fall easily in the top 10% of the breed. You would be hard pressed to find a Santa Gertrudis bull anywhere in the world that brings this much together in one eye-appealing package.

RED DOC BONITA 8017
DAM OF DINERO, SI SABE, & NEVER BETTER

Owned by: Cross Timbers Farm

Finding a bull that has one of the most impressive performance datasets in the Santa Gertrudis breed, combined with a striking phenotype that the most discriminating of cattlemen find attractive is challenging. However, Red Doc Si Sabe 3106 is that unique individual. Posting index numbers of 10-10-10 and 8 EPDs in the top 35% or better, 3106's offspring perform at the highest level. His dam, RDF Bonita 8017, is recognized as one of the breed's most attractive females and top performers with 5 EPDs in the top 1% with indexes of 1-1-1. This striking bull, backed by the breed's best pedigrees, offers cattlemen a number of breeding and marketing strategies.

Red Doc ET Red Carpet 8520 was one of the most balanced bulls in the 2020 Red Doc RHBS offering. He was the farm's pick to display at NCBA Cattle Con 2020. Red Carpet is a deep cherry red, curve-bending bull. His actual data sets, BW 65 lbs, WW 706 lbs, YW 1265 lbs, REA 14.4, and an IMF scan of 4.62 support 6 measured traits in the top 30% of the breed. His indexes of 30-30-30 indicate perfect balance, opening the door for a wide variety of breeding and marketing schemes. On the Red Doc Carcass Grid, 8520 posted YG 1.99, ADG 4.08, COG of $0.59 and a Feed to Gain of 5.64:1. Here is a great young sire with easy fleshing, whose first offspring offered a public auction brought a sale topping price of $20,500. Purebred producers and commercial cattlemen alike appreciate the many positive traits that Red Carpet 8520 brings to an operation.

Never Before 1136 is the bull that many consider the sire that changed the face of the Santa Gertrudis breed. His ability to moderate frame size while increasing muscle mass has made him one of the most utilized bulls in the breed. Currently, Never Before has 340 offspring recorded in the SGBI herdbook. This proven sire has a BW accuracy of .79, WW accuracy of .81, and a Marbling acc of .75. This 2011 model still brings a lot to the table with a WW EPD in the top 3%, YW EPD top 10%, Heifer Pregnancy EPD top 50%, CW EPD top 2%, REA EPD top 10%, and Marbling EPD in the top 45%. It is never too late to breed to one of the great ones. Red Doc Never Before 1136 has made a lasting impact on the breed and continues to change purebred and commercial operations.

Red Doc ET Lumbre 8509 puts together one of the most balanced data sets in the breed. Red Doc 8509 is out of an unique mating crossing Red Doc ET 6332, who is a Laureles 149/03, and a foundation Red Cow 3-4. The Red Doc 3-4 line goes back to Cherokee and Hammett lines. This bull was the 3rd most efficient bull of the 2019 Red Hot Bull Sale offering and had an amazing Cost of Gain of $0.40 and a Feed to Gain ratio of 3.78 lbs per 1 lb. of gain. Lumbre's actuals, BW 56 lbs, WW 644 lbs, YW 1,267, REA 14.5 and IMF 5.20. support 8 EPDs in the top 25%, resulting in indexes of 5-15-4. A negative BW EPD and growth EPDs in the top 15% tell us no dollars will be left on the table when his offspring are weaned and moved to grass or the yard. Lumbre 8509 is the type and kind of bull that all industry members appreciate. His feeder calves are efficient and hit end point targets while his daughters are the type of female that keep a cowherd profitable.

RED DOC DIRECT

Red Doc Farm is grateful for our customers and their trust in Red Doc genetics. We are committed to our customer's success and are pleased to offer, in collaboration with Superior Livestock Representative Mike Arnold, a weaned calf/feeder calf program designed to bring more dollars to your bottom line. The Red Doc Direct program offers a number of marketing options for Red Direct customers.

Requirements for the Red Doc Direct weaned calf/feeder calf program are detailed below. We understand the standards will not fit everyone's program; however, we hope these marketing opportunities help your cattle bring as much value as possible.

→ **Calves must be at least 85% sired by Red Doc bulls**

→ **Bulls must be castrated, and females open**

→ **VAC 60**

Calves vaccinated twice: At branding or 2-4 weeks prior to weaning and booster at weaning, OR at weaning and booster to label instructions.

Home Raised and Weaned minimum of 60 days prior to delivery.
Vaccination requirements:

- 2 doses 7-way, 8-way, or 9-way Clostridial.
- 2 doses viral 5-way (IBR, PI3, BRSV and BVD Type I & II). *IBR and PI3 must be chemically altered modified live or modified live with veterinarian's approval. BVD and BRSV can be modified live or killed.*
- 1 dose Mannheimia Haemolytica and/or Pasteurella Multocida prior to weaning or at weaning and booster to label instructions.
- Internal & External Parasite Control Recommended.

→ **BVD-IP Free**
Cattle have been tested BVD-PI free

→ **Certified Natural Plus**
Individually Identified with ranch tag, Free of Ionophores, Antibiotics, Growth Promoting Hormones/Steroids, Beta Adrenoceptor, or any type of animal by-product. Plus, seller will sign additional Natural Affidavit(s) for buyers as they apply ONLY TO NATURAL STATUS on the cattle.

RED DOC PROGRAMS

Red Hot Bull Sale

Our annual production sale is held the first weekend of April featuring 150 head of Gert and Gert influenced bulls. Make plans to arrive Friday night for dinner and the Elite Cut Female Sale highlighting several leading ladies from the heart of the Red Doc Herd. RHBS lots will be available for viewing all weekend - the live auction kicks off Saturday at 1pm. The final event is the RMSGA Spring Runoff Sale featuring lots from multiple outstanding herds.
